

## COSC-111 INTRODUCTION TO COMPUTER SCIENCE I PRACTICE WITH IF STATEMENTS

1. If the temperature, stored in an int variable called temp, is less than 32 degrees, print “Careful, roads may be icy!”.

2. Given an int x, if x is divisible by 2 print “x is even”. Otherwise print “x is odd”.

3. Given the current month, stored in an int called month, where January is 1 and December is 12), if the month is between June and August (inclusive) print “It’s summer!”.
